Experience

Amazon – Commerce Services

Seattle, WA

Software Development Engineer II

Aug 2024 - present

- Implemented a system to persist shopper identity data within order workflows on merchant storefronts, improving integration capabilities for merchants adopting Buy with Prime
- Led internal API migration efforts with zero customer facing downtime or service regressions by maintaining backward compatibility and rollout safeguards

Amazon – Santos Buy with Prime

Seattle, WA

Software Development Engineer II

Oct 2023 - Aug 2024

- Identified backend service latency bottlenecks and implemented parallelized request execution strategies, reducing end-to-end response times for checkout consumers by **40%**
- Externalized checkout promise-generation services through GraphQL APIs, simplifying third-party merchant onboarding and improving service extensibility
- Designed and implemented A/B experimentation infrastructure enabling frontend components to dynamically route requests across backend service variants
- Developed an asynchronous event queuing system leveraging SQS to pre-evaluate the buyability of products and drive down latency for customers by **90%**
- Built reusable and customizable React components that reduced integration effort for third-party merchants adopting Buy with Prime storefront experiences

Amazon – Santos Buy with Prime

Seattle, WA

Software Development Engineer I

Aug 2021 - Sep 2023

- Developed frontend and backend systems enabling merchants to offer Prime delivery and returns benefits directly through their own e-commerce storefronts
- Built React based shopper experience components for displaying product, shipping promise, and order information across third-party merchant sites
- Implemented extensible Java service plugins powering checkout promise-generation workflows
- Developed batch retrieval APIs that reduced shopper facing product data latency
- Participated in operational on-call rotations, driving service reliability and production issue resolution

IBM – Software Developer Intern

Austin, TX

Full Stack Developer

May 2019 - Aug 2019

- Designed and developed a full-stack web application using React and Express.js
- Consolidated log data from across various clusters globally

Skills

- **Primary:** Java/Kotlin, Javascript/Typescript
- **Experienced:** Java, Kotlin C#, JavaScript (TypeScript, ReactJS, NodeJS), Python, Git, GraphQL, AWS Technologies such as API Gateway, Fargate, Lambda, etc.
- **Proficient:** C, C++, Ruby, PHP, SQL

Education

Boston University – Boston, MA

2021

- B.S. in Computer Science
- Minor in Japanese
